SUMMARY

Design engineer with 6+ years shipping production UIs for B2B platforms, including transportation management software. Moves between design and code without a handoff, from creating the first wireframe to implementing components in production. Passionate about accessibility, design systems, and user joy.

SKILLS

Wireframing & Prototyping • Interaction Design • Responsive Design • User Research & Interviews • Usability Testing • Workshop Facilitation • Design Systems & Component Libraries • Accessibility (WCAG Audits) • AI-Assisted Development

TOOLS & SOFTWARE

HTML / CSS / JavaScript • Elixir • Phoenix • LiveView • Tailwind CSS • Git / GitHub • Figma / Figma Make / Figma MCP • Claude / Claude Code

EXPERIENCE

Design Engineer Apr 2019 – Sep 2025

National Freight Logistics (NFI) • Logistics & Transportation • Chicago, IL

- Owned end-to-end design and code implementation for workflows within a transportation management platform used daily by logistics professionals.
- Partnered closely with product managers to define requirements, explore solutions, and rapidly iterate designs based on feedback.
- Designed wireframes, prototypes, and high-fidelity mockups in Figma to prioritize information hierarchy in data-dense workflows.
- Co-stewarded a shared design system across a remote UX team, contributing components and fixes to ensure consistency across multiple applications.
- Conducted ongoing user research — interviews, workflow mapping, and in-person usability testing — with account managers and brokers to clarify problems before proposing user interfaces.
- Led design review workshops with product and engineering, presenting design rationale to build cross-functional alignment before development.
- Audited UIs for WCAG compliance and then implemented recommendations, improving usability for a broad user base.

Export Manager, Business Development Coordinator May 2016 – Sep 2017

Trade Associates Group (TAG) • B2B & E-commerce • Chicago, IL

- Redesigned and automated the company's product catalog system from scratch, including a trade show publication for overstock inventory.
- Synthesized monthly sales data for board-level review, building fluency in data analysis and business metrics.

EDUCATION

Flatiron School — Ruby on Rails & JavaScript
Kalamazoo College — International Studies, Chinese (Mandarin)

AWARDS & RECOGNITION

- Women Who Code Bootcamp Scholarship, 2018
- Project Alloy Grantee, 2017 & 2018
- RubyConf Scholar, 2018
